Active Forms

From NIDRRwiki

Active Forms (in the order they are administered as on REDCAP, the online data collection program used by the BMS)

Form Name	Purpose
Patient Status	Contains very basic demographic information, burn, birth and all other dates as well as criteria met for inclusion in the study group.
Info	Contains information about administration of the survey.
SF12	The SF12 is a standardized, multi-purpose, short form health survey based on the SF36, with only 12 questions.
SF10	The SF-10 Health Survey for Children is a brief, 10-item, caregiver-completed assessment designed to measure children's health-related quality of life (HRQOL).
CIQ	The Community Integration Questionnaire was developed as a standardized test to provide a measure of community integration after traumatic brain injury and was modified for use in the burn injury population.
SWL	The Satisfaction With Life Questionnaire is a standardized questionnaire that is a five question assessment of the patient's satisfaction with the way his/her life is at the current time.
Form 1	Contains demographic, burn injury, and wound information.
Distress	Distress scale made up of 12 items that patients are asked to rate on a scale of 0-10 regarding how much stress they experience from the item.
SWAP	The Satisfaction with Appearance Scale is a standardized 14-item questionnaire that assesses both the subjective appraisal and social-behavior components of body image among burn survivors.
Scars problems	Collects information on scars.
Followup info	Information on follow-up period and date collected.
Form 2	Form II - Adult and Peds - Followup information for the SF12, SF10, CIQ subscale, SWL, distress, scars, SWAP, school information for children, employment information for adults, wound information, therapy, scar, and surgery information.
LTF	Separate collaborative study to collect follow-up information at 5 and 10 years post-burn.

SF12

From NIDRRwiki

The SF 12 form collects health information from adult participants. Variables on this form are collected at pre-injury, discharge, and 6, 12, and 24 months post-injury. SF 12 pre-injury is collected from adults at discharge, asking patients to recall the 4 weeks prior to their burn for all items. The discharge SF-12 asks patients to recall the last seven days (or time since burn if the burn happened less than 7 days ago), and the recall period is 7 days for the 6, 12, and 24 month follow-up.

Please note, "all use of QualityMetric health surveys, scoring algorithms, translations, and benchmarking data requires a signed license agreement. Unless otherwise stated, a license is issued to a specified user for a single project, as defined on our Survey Information Request Form." We have not posted this measure for the general public; if you would like to request access to the SF-12, visit http://www.qualitymetric.com.

LTF SF12

From NIDRRwiki

The SF 12 form collects health information from adult participants. Variables on this form are collected at pre-injury, discharge, and 6, 12, and 24 months post-injury. SF 12 pre-injury is collected from adults at discharge, asking patients to recall the 4 weeks prior to their burn for all items. The discharge SF-12 asks patients to recall the last seven days (or time since burn if the burn happened less than 7 days ago), and the recall period is 7 days for the 6, 12, and 24 month follow-up.

Please note, "all use of QualityMetric health surveys, scoring algorithms, translations, and benchmarking data requires a signed license agreement. Unless otherwise stated, a license is issued to a specified user for a single project, as defined on our Survey Information Request Form." We have not posted this measure for the general public; if you would like to request access to the SF-12, visit http://www.qualitymetric.com.

If you have a login for the BMS DCC website, please click here (http://bms-dcc.ucdenver.edu /index.php?option=com_content&view=article&id=72) to access the SF12 variables.
